YOUR SURGICAL TEAM

Verified free, once you decide. Nobody else checks this.

Why this matters:

The Matamoros case in 2023 — where several patients died during cosmetic procedures — was caused by a problem with anesthesia, not the surgeon's skill. It's the most overlooked check in medical tourism.

Anesthesiologist

|                                                                                                                                                                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>License and specialty certification</b><br>Confirmed active through the Mexican board of anesthesiology. |
|  <b>No legal complaints on file</b>                                                                          |

Checked against the same legal database as the surgeon.

✓ **Staff or freelance status**

We tell you whether they're a permanent team member or brought in per case.

## Surgical nurse(s)

✓ **Nursing license and surgical specialty**

Confirmed active.

✓ **Emergency response certification (ACLS/BLS)**

Confirmed current — this is who responds first if something goes wrong in the room.

We'll send this section within 24 hours of you telling us which surgeon you chose — just message us the clinic name.

---

**What "verified" means:** we found this credential in official Mexican records at the time we checked. It is not a guarantee of a safe outcome — it tells you what the records show, so you can make your own informed decision. This report is not medical advice. Valid 6 months from issue date. © 2025 MedVerify MX · medverifymx.com
